

PEARLS OF WISDOM.....

The Mahaswamiji, our guiding light once said, “**THERE IS NOTHING BUT A BRIGHT FUTURE....**”. We, at BGSIPS, have always strived to conceptualise his words into actions. These words as the “Mool Mantra” I, as the Principal, right from the inception of the school, have relentlessly worked to transform the future of our students.

Rapid change that occurs in technology have always been taken into consideration when we plan our teaching-learning process. We have been successful in engaging the students in Active learning through educators who make use of this technology in our classroom interactions. We follow a systematic way of actions, strategies and policies that are aimed at improving the quality of teaching learning. But in this modern course of transaction of lessons, it is made sure that traditions and values are never forgotten.

We firmly believe in the overall development of the students. Diversity that is clearly prevalent in the school is a compelling aspect that enables overall development as well as value system in students. Our students represent all the cross sections of the country and society. Ample focus is provided especially to students who are with us from the underrepresented section of the society to help them to be a part of the mainstream.

We, at BGS strongly endorse that co-curricular activities are an integral part of educational system. Sports and cultural activities are a regular part of our almanac. These activities enhance the self esteem, self confidence, social co-operation and leadership skills in an individual. Physical education and fitness is a compulsory part of the curriculum and our students have participated in various national sports events and have brought many accolades to school.

Life skill development in students is another area that we focus upon. We train our students to be adaptive to situations and adorn a positive approach that will enable them to tackle challenges of everyday life. Students are also taught to be responsible and lead from forefront by entrusting them with school council memberships. Student Council members are school leaders and student role models who guide and counsel their peers, helping to develop positive behaviour and values.

In this whole course of deeds, our teachers play a vital role. They are the key element in reforming the students. They are role models, nurturers and caregivers. The mentors follow five – key concepts of motivational theories- Empowerment, Usefulness, Success, Interest and Caring. By following this theory and training our students, we see that they excel in various fields.

Above all these, I as the Principal believe in “the connect” we develop with each student. I believe in touching their lives through this connect and carving them into good human beings .I have always adopted an “OPEN DOOR POLICY” for students, faculty and parents. I firmly believe through communication and sharing our thoughts, I can serve the needs of the people around me better. We at BGS believe in upholding the motto- **Service to Mankind is Service to God.**
